Description	
Right now, people are downloading cephadm directly from the source tree.	
https://docs.ceph.com/en/latest/cephadm/install/#curl-based-installation	
<pre>curl --silent --remote-name --location https://github.com/ceph/ceph/raw/pacific/src/cephadm/cephadm</pre>	
This prevents us from automatically assembling the cephadm binary in any form.	
If we want to have a chance to compile or zip or assemble the cephadm binary, We need to move away from the git source tree.
