Description

After having 5 mon/mgr daemons and then downsizing both services to 3 daemons list_servers, which is used to detect strays, falsely reported mon/mgr daemons on the hosts where mon/mgr daemons were removed from when downsizing the services <https://pastebin.com/raw/qp631feA>. Eventually, the listing of mgr services corrected itself but the stray "mon.vm-04" health warning stuck around until the mgr was restarted.

```
[ceph: root@vm-00 /]# ceph health detail
HEALTH_WARN 1 stray daemon(s) not managed by cephadm
[WRN] CEPHADM_STRAY_DAEMON: 1 stray daemon(s) not managed by cephadm
      stray daemon mon.vm-04 on host vm-04 not managed by cephadm
```
