teuthology - Feature #50919

Have teuthology-lock check paddles DB for node job stats

Description

There are a few scenarios (a BMC being offline, for example) where a testnode can repeatedly cause every job it gets to die. See attached.

That's nuts. Could we have teuthology-lock (or whatever would be more appropriate.. dispatcher?) check a node's last X job stats and if they're DEAD (not FAIL), mark the node down and use a different one?
