Description

if mon_host != ip[...ip] (as passed on the CLI) then mon_host should be appended in cwd/{cluster}.conf and /etc/ceph/{cluster}.conf

mon_initial_members should also be updated if the clients reference this value.

This is necessary so that clients can find any available monitor in the event that not all monitors are created at the same time

History

#1 - 09/24/2014 06:19 AM - Loïc Dachary

- Project changed from Ceph to devops
- Category set to ceph-deploy

#2 - 10/03/2014 09:45 AM - Neil Levine

- Project changed from devops to Ceph-deploy
- Category deleted (ceph-deploy)
