Description			
Make a configurable setting where you can enable the RGW to return the bucket name of the bucket the request came for in a response header.			
This can be used for traffic accounting outside RGW when for example using a HTTP caching-proxy like Varnish.			

History

#1 - 01/17/2014 01:02 AM - Wido den Hollander

- Status changed from New to Resolved

Merged into master as of yesterday, resolved.

#2 - 01/17/2018 03:25 PM - John Spray

- Project changed from Ceph to rgw

- Category deleted (22)

Bulk reassign of radosgw category to RGW project.
