Description	
Just a small thing I noticed today:	
<pre>root@noisy:~# rados --help usage: rados [options] [commands] listxattr objname getxattr objname attr setxattr objname attr val getxattr objname attr rmxattr objname attr -o outfile specify input or output file (for certain commands) root@noisy:~#</pre>	
'getxattr' has a duplicate line.	
The attached patch just removes the duplicate line.
