Backport:		Pull request ID:	
Description			
<ul style="list-style-type: none">- change 'rep' to 'replicated'- create 'osd_pool_default_crush_rule_{replicated,erasure}' options to replace osd_pool_default_crush_rule- make pool create verify the specified crush rule has a type (erasure or replicated) that matches part of a larger pull request that contains unit tests- make cluster creation create a generic erasure indep rule (min 2, max 20?). make it use the create_simple_rule helper.- possibly change (or verify that) the default crushmap creation uses the same create_simple_rule helpers that the mon command exposes
