| Backport: | | | |
| Description | | | |
| Support PUT or PATCH operation to change user account's password. GUI code exists from 1.x, though the 1.0 backend didn't actually implement it. | | | |

Revision cbf34809 - 02/14/2014 07:26 PM - John Spray

calamari_rest: User account PATCH/PUT (password change)

Users can change their own password but not those of other users. Refactored the user view code to avoid a separate view for /user/me, so that all ops can refer to a PK or 'me'.

Fixes: #7097

History

#1 - 01/10/2014 03:26 PM - John Spray

While rewriting the view to support this, also make sure the UserSerializer is including display name and email address.
